ROSE HILL NURSERY

Nurserymen Landscape Architects

MINNEAPOLIS AND ST. PAUL

SINCE 1874

NURSERY OFFICE HOURS

From April 10th to June 1st, the office is open from 7:30 A. M. until 9 P. M., balance of the year 8 A. M. until 5:30 P. M.

TWIN CITY DELIVERIES

Twin City orders amounting to \$1.50 or over are delivered free, otherwise a charge of 50c will be made to cover cost of delivery.

POSTAGE REQUIRED FOR ORDERS WANTED BY PARCEL POST

If shipment is desired by parcel post please include an amount to cover postage and packing. Please note average weights indicated at the headings of the various kinds of stock and compute the amount from the parcel post rates given on page 33.

SELECT YOUR OWN PLANTS

Our customers are welcome to select plants without extra charge in our 100 acre nursery. There is satisfaction in selecting your own plants where there are thousands of shrubs, trees and evergreens to choose from. If you cannot do so, however, we will make careful selection for you.

Direct from the grower you are assured fresh, healthy plants that have not been weakened by exposure in stores or sales grounds.

BENEFITS OF ORDERING EARLY

If customers will kindly place their orders as early as possible the best selection of stock and prompt delivery of the goods when planting time arrives will be assured them.

FREE PLANTING BOOKLET

A booklet giving instructions for the planting and care of nursery stock accompanies each order.

THE PLANTING SEASONS

Planting may be done in the spring, generally about April 1st to June 1st, or in the fall from September until the ground freezes solid.

PLANTING CHARGES

A planting charge of 45% of the cost of trees, shrubs and perennials, 30% of the cost of evergreens, and 15c per lineal foot of hedging, is made when we do the planting in the Twin Cities and suburbs. The minimum planting charge is \$2.00. Black soil, if required, is charged for on a yardage basis, \$2.50 being charged for a single yard or \$2.00 per yard when two yards or more are purchased, or the customer may furnish the soil. Carting away of poor soil or debris is also charged for.

EXPERIENCED GARDENERS

From June 1st to October 1st we have available experienced men for trimming hedges and shrubs and for general garden work.

Rose Hill Guarantee

We use every precaution in the growing and handling of our stock to supply only plants of highest quality full of life and vigor. However, the Rose Hill Nursery agrees to replace at one-half the original price, any nursery stock purchased direct from them at the prices listed in this catalog, that dies before October first following planting. Prompt payment of accounts must be made in full or the above guarantee is void.

Spraying Materials

ARSENATE OF LEAD (Powdered)

Kills all insects which eat the leaves, by poisoning them. May be dusted on dry or applied in liquid form. Directions are printed on the can.

One-half pound can\$0.35

BLACK LEAF 40

A highly recommended spray to kill plant lice and other sucking insects which cause the leaves to lose their color and curl up. Kills by coming into contact with the body of the insect. Directions on bottle.

1-oz. bottle\$0.35

DRY LIME SULPHUR

Dissolved in water it is used as a dormant spray against San Jose and Oyster Shell scale and as a summer spray against pine leaf scale.

1 lb.\$0.40

KOLO DUST FOR RED SPIDER ON EVERGREENS

A very efficient powder spray to kill the red spider.

1 lb.\$0.30 2 lbs.\$0.50

SPRAYER (To Apply Liquids)

We offer and recommend a one-quart Mason jar sprayer. It is strongly built and the double siphon tube gives a large, dense, fog-like spray. Price, 75c each. Weight for shipping, 3 lbs.

DUSTER (To Apply Powders)

To combat certain insects it is best to use a dust spray. The duster we offer, though inexpensive, is strongly built and will operate successfully with all insect powders. Price, 45c each. Weight for shipping, 2 lbs.

MARSH HAY (For Winter Protection)

Perennial flowers and strawberries should be covered with marsh hay in late fall to protect them from alternate freezing and thawing, which causes winter injury. One bale will cover about 200 square feet of garden. For sale during October and November.

Per bale\$1.00

A scientifically prepared plant food for lawns, trees, flowers and gardens. See next page.

The Lawn

The production of grass seed mixtures has, through intense study, become highly specialized. Rose Hill Nursery offers lawn seed which is composed of a mixture, in correct proportions, of the grasses that have proven most satisfactory for this section. Only the highest quality seed of the various kinds is used; for the difference in cost between the very best seed and cheap seed is so little, and the difference in results from their use is so great.

Use 1 pound to 200 square feet of new lawn area to be seeded.

POSTAGE—Please include payment for postage if seed is desired by parcel post. See parcel post rates on page 33.

ROSE HILL LAWN SEED

The combination of seeds used in this mixture is the result of our many years of creating beautiful home grounds. Though the highest grade Kentucky Blue Grass forms the basis of this mixture, other grasses are used to hasten the lawn and act as a nurse crop to the blue grass seed, which is slow to germinate. No better lawn seed can be bought at any price and we highly recommend it to you as a mixture which will produce a beautiful, thrifty lawn.

ROSE HILL SHADY PLACE SEED

This mixture has been especially developed to produce a lawn in fairly dense shade. Under evergreens and low branched trees, where no sun ever strikes, no grass can possibly survive, but where the shade is not too dense this mixture will prove satisfactory.

ROSE HILL FERTILIZER

All vegetation is benefited by the intelligent application of a fertilizer because it supplies the soil with available plant food. Such application is followed by profit in the form of finer lawns, trees, shrubs, flowers and fruit. Rose Hill Fertilizer is scientifically manufactured to be used in gardens, for feeding trees and on the lawn in the North Central states. It is odorless and pleasant to handle. Persons, who are wise in fertilizer buying, judge the value of the fertilizer by the chemical analysis, which law requires be printed on every package of fertilizer. Rose Hill Fertilizer ranks among the very best in plant food value. The guaranteed analysis is Nitrogen 6%, Available Phosphoric Acid 10% and water soluble Potash 4%. Lawns especially require Nitrogen for luxurious growth. Being highly concentrated a small quantity of Rose Hill Fertilizer covers a large area.

Use 1 pound to each 35 square feet or 100 pounds to each 3,500 square feet. See diagram on page 10 for proper amounts and method of use for feeding trees. Complete directions for applying accompany each bag of fertilizer.

RICH PLANTING SOIL

Excellent planting soil delivered in the Twin Cities or suburbs at \$2.50 per single yard or \$2.00 per yard when two yards or more are purchased. Per sack, one bushel, \$0.50.

Lawn dressing soil \$2.75 per single yard, \$2.50 per yard for two yards or more.

PULVERIZED PEAT MOSS

A splendid material to spade into soils to make them in better condition for plant growth. Peat causes a clay soil to become more friable and holds moisture in sandy soils. Used as a mulch about plants or as a top dressing for lawns it helps greatly to conserve moisture. Odorless and pleasant to handle.

OUR LANDSCAPE SERVICE TO RESIDENTS OF THE TWIN CITIES AND SUBURBS

To local residents, where personal consultation is possible, plans and estimates are furnished without charge.

Upon request, one of our landscape architects will call and consult with you. After securing such suggestions as you may have to offer regarding the landscape beautification, a plan and estimate is prepared and presented to you. This incurs no obligation. Or if you wish, you may bring a picture of your house or measurements of that part of your grounds you wish us to plan for and we will help you at the office. Besides doing the planning and furnishing the stock, our service is complete in that we do the planting, too, if you wish. Phone Nestor 7541 from either Minneapolis or St. Paul.

HOW WE SERVE OUT-OF-TOWN CUSTOMERS BY MAIL OR PERSONAL CALL

We offer a helpful mail advisory service to out-of-town customers. Upon request we will mail a chart, illustrating what information is required to enable our architects to intelligently help you. When you send us the necessary information we will suggest how best to make your property most attractive.

In the developing of larger residence properties, grounds about public buildings, parks or cemeteries, a personal call by one of our landscape architects is often advantageous. Our architects are available for such calls and we will gladly give full information regarding the cost of their services upon request.

Beautiful grounds express refinement and good taste

Competent foremen are available to out-of-town residents who desire our supervision in the carrying out of a landscape development.

EARLY PLANNING SECURES THE MOST PROMPT SERVICE

We welcome the opportunity to plan for you at any time that meets with your convenience, but we can give the most prompt service before the rush brought by the warm days of spring. Snow on the ground is no hindrance to planning. February and March requests for planning help are especially welcome.

Use The Rose Hill Landscape Service

Visit Our Nursery

Here at Rose Hill Nursery you will find a hundred acres of the highest quality trees, shrubs, evergreens and hardy perennial flowers. These plants are grown for discriminating customers, who want the best of stock grown in the north to assure hardiness.

There are acres of evergreens you will enjoy seeing as well as shade trees, flowers and ornamental shrubs.

At tulip time, along the entrance drive, thousands of tulip blooms delight the eye and later peonies and other perennials are blooming in profusion.

Come and visit us—you are most welcome.

NURSERY VALUES

THE LOGICAL PLACE TO BUY trees, shrubs, evergreens and flowers is direct from the nursery where they are grown.

The nursery trade grows plants, living things, and then sells them to those who will buy. These living things are valueless to the purchaser unless they continue to live after he has bought them. There are certain definite conditions required while these plants are being transferred from the nurseryman until they are properly planted on the purchaser's grounds.

For this reason, nursery stock does not lend itself to merchandising by a middleman to be piled on store counters and sold as cheap, shoddy merchandise.

Anyone with plant sense knows that every hour a plant is separated from mother earth, it constantly loses vitality unless precautions are taken to prevent it.

ROSE HILL NURSERY plants reach your home as fresh as the moment they were dug from the earth in which they grew. Dealing with the Rose Hill Nursery you are assured of dependable quality and efficient service backed by sixty-six years of honest business practice.

Entrance to Office and Sales Grounds

HOW TO REACH THE ROSE HILL NURSERY

From MINNEAPOLIS, by auto, drive out East Hennepin Ave., directly to the Nursery, which is located two blocks east of the city limits. New paving is now completed on East Hennepin Ave.

From Minneapolis, by streetcar, take Como-Horriet car going towards St. Paul, get off at Eustis Street and walk three blocks north.

From ST. PAUL, by auto, drive north on Snelling Ave. past Fair Grounds one-quarter mile to Lorpenteur Ave. (also known as County Road A), turn west (left) one and one-half miles to our office.

From St. Paul, by streetcar, take Como-Horriet streetcar going west, get off at Eustis Street and walk three blocks north.

Evergreens

PRICES INCLUDE BALLING AND BURLAPPING OF ALL EVERGREENS

THIS means that the tree is dug from the soil with the earth remaining undisturbed about the roots of the tree. The ball of earth is securely fastened with burlap. This method practically insures safe transplanting.

In some varieties we have larger sizes than listed, upon which we will be glad to quote prices.

Evergreens are attractive the whole year through

Rose Hill Evergreens Are Famous for Their Beauty

PLEASE NOTE—Excepting the small sizes which may be shipped by express, balled evergreens are best shipped by freight or truck line.

ARBORVITAE, American. (Thuja Occidentalis.) A native evergreen. Usually grows bushy at the bottom, tapering toward the top. Color a rich dark green. Very decorative singly or in groups. Will grow in partial shade. During very dry years this variety is often severely injured by drought.

Mugho Pine

JUNIPER, Silver Cedar. (*Juniperus Scopulorum*.) This attractive evergreen is a bright silver blue in color which is most pronounced during hot, dry weather. It is a fine substitute for the Pyramidal Arborvitae where that tree does not thrive, being narrow, symmetrical and compact. Having but one central stem it is not subject to breakage from heavy snows. The selected type we offer insures an even silvery blue color and uniform growth. This evergreen does not turn brown during the winter and is truly beautiful the year around. During the recent extremely dry years when all varieties of Arborvitae as well as most other evergreens have suffered serious losses, the Silver Cedar has stood both the dry and cold weather without injury. There is no better tree to plant as a substitute for Pyramidal Arborvitae, for it is hardy, does not discolor in winter, is compact in growth and dependable. See picture bottom of page.

PINE, Montana. (*Pinus Montana*.) This tree, though quite similar, is a taller-growing type than the Mugho Pine. The darker foliage lends a splendid contrast with other trees. One of the very best evergreens for planting in foundation groups.

EVERGREEN PLANTING SUGGESTIONS

A FRONT ENTRANCE PLANTING

At the front entrance the tall Silver Cedars or the Red Cedars are most appropriate. The low Mugho Pines next to the steps contrast nicely in color and form, as do also the Juniper Savin which complete the groups.

A FRONT SIDEWALK PLANTING

A Mugho Pine at each side at top of steps with two Savin Junipers below gives a very pleasing effect. On narrow lots the Mugho Pines may be used alone.

SPRUCE, Black Hills. (Picea Canadensis Albertiana.) Foliage varies from green to bluish tint, and is at all times bright and fresh looking. The tree is symmetrical, compact and bushy, and one of the hardiest of all spruces. Planted as a lawn specimen or in the border it is eminently satisfactory.

How to Plant Evergreens

(1) Dig hole a foot larger and deeper than ball of earth. Provide good, loamy top soil to fill around ball.

SPRUCE, Colorado Blue. (Picea Pungens Glauca.) A beautiful tree, well known and admired by all. The blue color is brightest in early summer and gradually changes during the summer to a dull blue color. The tree is perfectly hardy and constitutes one of the most beautiful specimen evergreens available. See picture.

EVERGREEN PLANTING SUGGESTIONS

FOR CORNER OF HOUSE

Here either the Silver Cedar or the Red Cedar provides the needed height. With a Montana Pine at each side, and either a Pfitzer or a Savin Juniper between these two, the effect is harmonious.

A REFINED MONUMENT PLANTING

A Silver Cedar at each end of the monument with a Juniper Savin in front and in back presents a dignified and refined appearance. Low Mugho Pines may be used instead of the Savin Junipers, if preferred.

Decorative Shrubs

Fresh, Vigorous Plants—Sure to Grow

What delightful memories children will have of a yard like this

Heights of shrubs following the name denote size at which the plants present their maximum beauty.

ALMOND, Flowering. (*Amygdalus*.) 4 to 5 ft. Small, pink double flowers along stems in May. Needs winter protection.
2 to 3 ft. \$0.60 ea. 3 to 4 ft. \$0.75 ea.

ALMOND, Siberian. (*Amygdalus Siberica*.) 2 to 3 ft. This new variety of Almond is of dwarf growth, perfectly hardy without winter protection. The bush is completely covered with double, bright rose pink fragrant flowers early in the spring. The leaves turn to gold and red in the fall creating a beautiful appearance at that time also. Very desirable.
12 to 18 in. \$0.35 ea. 18 to 24 in. \$0.50 ea.

ARALIA, Devil's Walking Stick. (*Aralia Spinosa*.) 8 to 10 ft. Attractive, tall-growing shrub with very prickly stems and large, deeply cut compound leaves 3 to 5 feet long. Tropical in appearance. Plant in protected locations. See cut page 8.
2 to 3 ft. \$0.75 ea. 3 to 4 ft. \$1.00 ea.

ARROWWOOD. (*Viburnum Dentatum*.) 7 to 8 ft. Flowers white, flat-topped, followed by blue berries in the fall. A large shrub with bright green foliage coloring prettily in the fall.
18 to 24 in. \$0.40 ea. 3 to 4 ft. \$0.75 ea.
2 to 3 ft.50 ea.

Barberry, Japanese

FLOWERING shrubs create natural beauty and loveliness and are indispensable to the landscape gardener.

Please note what an important part shrubs play in the landscape design to the left.

Against the house foundation the shrubs blend the house with the grounds and create a lovely softening effect. On both sides of the property and across the rear, shrubs contribute a delightful frame to the picture. They also give privacy and a beautiful background for annual and perennial flowers, besides their own beauty of flowers, berries and varying foliage colors.

Our large list of hardy varieties contains all the worth-while shrubs adapted to the rigorous climate of this section of the country. By thoughtful selection continuous interest may be obtained from early spring until late fall through successive blooming periods.

POSTAGE

If shipment is wanted by parcel post please add for postage and packing, figuring average weights for shrubs as follows: 12 to 18 in. shrub, 1 lb.; 18 to 24 in. shrub, 2 lbs.; 2 to 3 ft. shrub, 3 lbs.; 3 to 4 ft. shrub, 4 lbs. See parcel post rates on page 33.

BARBERRY, Japanese. (*Berberis Thunbergii*.) 2½ to 3 ft. A splendid dwarf shrub, conspicuous for its good foliage. The foliage is brilliantly colored in the fall and the attractive red berries cling well into the winter. A thrifty grower most anywhere. Good in front of taller-growing shrubs and as a hedge.
12 to 18 in. \$0.25 ea. 2 to 3 ft. \$0.50 ea.
18 to 24 in.35 ea.

(For Barberry hedge plants see page 14.)

BARBERRY, Red-Leaved. 2½ to 3 ft. A recent introduction. Similar to the Japanese Barberry excepting in foliage which is a deep purplish red. A valuable shrub for color in the border.
12 to 18 in. \$0.50 ea. 2 to 3 ft. \$1.00 ea.
18 to 24 in.75 ea.

BUCKTHORN, Common. (*Rhamnus Catharticus*.) 6 to 7 ft. A very hardy shrub with dark green foliage. It will thrive in exposed locations where many other shrubs will not succeed. Valuable when planted as a shrub or when planted as a hedge. Stands shearing well.
2 to 3 ft. \$0.35 ea. 4 to 5 ft. \$0.75 ea.
3 to 4 ft.50 ea.

(For Buckthorn hedge plants see page 14.)

BUCKTHORN, Glossy Leaved. (*Rhamnus Frangula*.) 6 to 7 ft. A handsome, tall shrub with shining dark green foliage. The attractive berries change from red to black. Distinctive in appearance.
2 to 3 ft. \$0.50 ea. 3 to 4 ft. \$0.75 ea.

BUTTERFLY BUSH. (*Buddleia*.) 4 to 5 ft. Also known as Summer Lilac, as it resembles the common Lilac in general color and effect. It dies back with the frost in the fall and the dead wood should be cut back nearly to the ground; but the roots are usually uninjured and it quickly grows to a height of 3 to 5 feet or more in the spring. It blooms continually from July to frost, bearing long, slender, arching spikes of light blue, Lilac-like flowers, which are fragrant.
2 to 3 ft. \$0.50 ea.

Lilac, French Hybrid Varieties

THESE splendid Lilacs are far superior to the common varieties, blooming much more consistently, with a greater profusion of larger flowers. The plants seldom send out sprouts around the plants as the old purple and white kinds do. They generally bloom the first year after planting. Available in a wide choice of flower colors, they constitute a most valuable group of shrubs. No home yard should be without some of these Lilacs and they are equally valuable for park use. The following varieties are among the most hardy and very best Lilacs of this class.

ALFONSE LAVALLE. The lovely, double flowers of this variety are a delightful, clear lilac color. The flowers are large and the bush a general favorite.

CHAS. JOLY. A choice double dark red Lilac. The bush is an upright grower of medium size, producing freely, large clusters of gorgeous flowers. We take pleasure in recommending this variety as being extra fine.

CHAS. X. The deep reddish purple flowers of this Lilac are magnificent. The flowers are single and borne in large flower masses very profusely.

DOROTHY HAWKINS. Single. Deep reddish purple in large clusters. Excellent.

LUDWIG SPAETH. Single flowers. The red color a brilliant intense rich purple-red that holds up well in the sun and lasts a long time. Flower panicles are long and held erect well out from the foliage. It is a profuse bloomer, commencing to bloom when only two feet high. A most wonderful Lilac.

MADAME LE MOINE. A fine, white Lilac which contrasts beautifully with colored Lilacs. Madame Le Moine is one of the very best double white flowering bushes. Blooms in abundance on a fine, strong plant.

MADAME PERIER. Double. Dwarf grower, flowers creamy white. A lovely Lilac.

MARIE LEGRAYE. The flowers of this variety are white and single. Starts to bloom when plant is quite young.

PRESIDENT GREVY. The violet colored blossoms are immense in size and very double. The bush is the most vigorous of any of the French sorts.

PRINCESS ALEXANDRA. Flower clusters are very large and compact. A strong growing, profuse blooming bush with excellent foliage. A very fine, single, white variety.

MAPLE, Tatarian. (Acer Tataricum Ginnala.) 8 to 9 ft. A graceful shrub-like tree with handsome foliage which turns red in autumn. The brilliance of this coloring is unsurpassed.

The modern style in planting is to use plant materials to the fullest extent possible that they bring to your grounds the color, the beauty and the charm for which the modern place is noted.

Hardy Hybrid Rugosa Roses

THESE are especially valuable for growing in Minnesota on account of their hardiness. THEY NEED NO WINTER PROTECTION. Rugosa Roses are erect growing, with spiny stems and have tough crinkled foliage of a healthy green. They bloom throughout the summer and fall. Particularly useful for planting in shrubbery, in foundation planting, for hedges, along driveways, borders of properties and the like where the fragrant double flowers will be enjoyed by all. 3 to 4 ft. high.

PRICE, EXTRA LARGE, 18 to 24 inch, 60c EACH; 2 to 3 ft., 85c, EXCEPT HANSA. OFFERED IN THE FOLLOWING VARIETIES.

AGNES. The coppery yellow buds become amber gold upon opening. Produced freely, the blossoms are well shaped and sweetly fragrant. The only Rugosa which is truly yellow.

AMELIA GRAVEREAUX. The delightful flowers resemble the Tea Roses in their form and fragrance. They are double and rich, dark red in color. Blooms over a long period. Forms a nice vigorous bush.

BLANC DE COUBERT. With snow white blooms, double and fragrant, and arranged in large clusters. Blanc de Coubert is at its best during the summer and fall. Might be called a white Hansa, and like that variety is excellent for a hedge. Thrives in the coldest places and is the white "Eskimo Beauty." Especially pretty in half open bud.

Cotoneaster Hedge—The clean-appearing, glossy leaves and robust growth make this hedge a favorite

PLEASE NOTE—25 or more plants are sold at the 100 rate.

THE cheapest wall or fence and the best is the living hedge. It does not need to be painted as it gives itself a new coat every year. A hedge will effectively screen out undesirable views or shut out trespassers. Plant a hedge where you need a fence. Listed below you will find hedge plants suited for all purposes and locations. Our plants are grown in the open nursery rows where they have been given ample room for both root and top development.

PLANTING THE HEDGE

We recommend planting Buckthorn, Cotoneaster and Caragana in two rows, each row 8 inches apart and the plants placed 12 inches apart in each row, staggered.

For a narrow hedge, the plants may be planted eight inches apart in a single row.

The remainder of the plants listed on this page should be planted one foot apart in a single row.

Do not fail to trim every plant immediately after planting to at least one-half its original size. Leaving only the lower one-fourth would be still better. The secret of securing a dense hedge is to cause the plants to branch out near the ground by trimming as advised above.

POSTAGE

If shipment is wanted by parcel post please add for postage and packing. Figure average weight for 100 hedge plants as follows: 12 to 18 in. sizes, 22 lbs.; 18 to 24 in., 30 lbs.; 2 to 3 ft., 50 lbs.; 3 to 4 ft., 70 lbs.

See parcel post rates on page 33.

HEDGE PLANTING CHARGES

A planting charge of fifteen cents per foot is charged for planting all varieties and sizes of hedge plants.

BARBERRY, Japanese or Thunberg's. (*Berberis Thunbergi*.) Of low spreading growth, forming a dense hedge. The twiggly branches are set with small sharp thorns and bright, clean foliage which in the fall turns to gold and scarlet. The brilliant, red berries are attractive in the fall and winter. A fine plant for a low hedge whether trimmed or allowed to grow naturally.

Buckthorn Hedge—A strong, thrifty grower, it presents a fine appearance and gives real protection to the grounds

Hedges

Beautiful Borders of Living Green

BUCKTHORN. (*Rhamnus Catharticus*.) A very satisfactory plant to use when a medium high to tall hedge is wanted. It stands trimming so well that it can be kept for a long period at practically any height desired. It is hardy and one of our most satisfactory hedge plants. The Buckthorn we offer have been transplanted and twice cut back, making the plants well branched right from the bottom. Many nurseries offer plants which are seedlings and do not have the root system or the low, well branched tops.

2 to 3 ft... 12.50 per 100 4 to 5 ft... 20.00 per 100

CARAGANA or SIBERIAN PEA TREE. (*Caragana Arborescens*.) Thrives in any well-drained soil and is hardy in the most exposed locations. Is suitable for use where a medium or tall-growing hedge is desired. Sometimes the foliage does not remain in good condition during the latter part of the summer.

12 to 18 in. \$ 7.50 per 100 2 to 3 ft. \$15.00 per 100
18 to 24 in. 10.00 per 100

COTONEASTER or QUINCEBERRY. (*Cotoneaster Acutifolia*.) The fresh-looking, glossy green foliage of this plant and its thrifty, dense growth, combined with its hardiness, makes it ideal as a hedge plant for use in Minnesota and surrounding states. Even during periods of extremely dry hot weather the foliage retains its healthy glossy green color, having the appearance of being varnished. It stands trimming well. The foliage turns to lovely shades of yellow and red in the fall. We especially recommend this hedge. See cut top of page.

2 to 3 ft.. 27.50 per 100

LILAC, Common Purple or White. (*Syringa Vulgaris*.) Though this plant yields readily to trimming, it is best suited for use as a hedge where it may be left untrimmed. The lovely flowers, one of its chief attractions, would not be produced if trimming were done. Should be planted only where the plants will have room to grow quite large. Please specify color wanted.

2 to 3 ft.. 22.00 per 100

HANSA ROSE. (*Hybrid Rugosa*.) This plant makes a fine untrimmed hedge. The healthy, attractive, heavy, crinkled foliage withstands drouth and extremely hot weather without injury. The large double red flowers are fragrant, very ornamental and are produced in great abundance during June and early July. Scattered flowers are also produced during the balance of the summer and fall. Plants should be cut back to within a foot of the ground early each spring to produce strong flowering shoots.

Climbing Vines

VINES create a graceful softening effect. The flowering beauty of many varieties has splendid merit and as shade givers they are very fine. Used to embellish an otherwise drab wall or ugly bank, they are indispensable.

POSTAGE—If shipment is wanted by parcel post please add for postage and packing figuring at the average weight of 1½ pounds to each vine. See parcel post rates on page 33.

BITTERSWEET. (*Celastrus Scandens*.) A hardy, strong-growing vine with glossy leaves. The yellow flowers are followed by conspicuous reddish-orange fruits.

2 year.....\$0.50 3 year.....\$0.75

CLEMATIS HENRYI. The lovely white flowers are truly gigantic in size. Growth is vigorous, often reaching eight feet in height.

2 year.....\$1.00 3 year.....\$1.25

CLEMATIS JACKMANI. The gorgeous display of bloom presented by this plant is unequalled among climbing vines. The striking purple flowers often measure six inches across. Being of refined habit it may be grown against the house and in other situations where a coarse-growing vine is not wanted. This Clematis is the most popular vine of all. See cut.

2 year.....\$1.00 3 year.....\$1.25

CLEMATIS, MADAME EDWARD ANDRE. Flowers are about the same size as the Jackmani, crimson red in color. Has a long season of bloom.

2 year.....\$1.00 3 year.....\$1.25

CLEMATIS PANICULATA. The flowers are white, small and star-shaped, very fragrant and so abundant as to almost hide the foliage. It blooms late in the summer when most other vines are through blooming.

DUTCHMAN'S PIPE. (*Aristolochia Sipho*.) A vigorous, rapid-growing climber with pipe-shaped flowers. The light green leaves are of very large size, and overlapping they cast a dense shade. \$1.00 each.

CLEMATIS CULTURE

Plant in well drained rich soil. The hole should be deep enough to accommodate the roots without spreading too much. If the roots are very long and numerous they may be cut back to 6 or 8 inches and some of the weaker roots thinned out. The roots should be separated enough so that soil comes firmly into contact with all the roots. Water thoroughly once a week only, if rain has not already done the watering. As it is essential to keep Clematis roots cool and moist a mulch of peat moss may be used to advantage.

GRAPE, Beta. This Grape makes one of the best vines for covering porches and arbors. It is perfectly hardy without winter protection and produces an abundance of fruit of medium size.

2 year extra large.....\$0.35 3 year extra large.....\$0.50

HONEYSUCKLE, Scarlet Trumpet. (*Lonicera Sempervirens*.) An old favorite; bearing scarlet, trumpet-shaped blossoms over a long period.

2 year.....\$0.50 3 year.....\$0.75

IVY, Boston. (*Ampelopsis Vetchi*.) A very lovely small leaved vine, refined in habit. Clings firmly to such surfaces as presented by brick, coarse plaster, etc. The foliage is fresh deep green in summer, changing to the brightest shades of crimson and yellow in the fall.

2 year.....\$0.50 3 year.....\$0.75

IVY, Engelman's. (*Ampelopsis Engelmani*.) The hardiest climbing Ivy for this climate. Splendid to cover brick or stone walls or any other rough surface where a vigorous growing vine is wanted. It is a rapid grower. The young growth has a purplish tinge, maturing dull green and turning a bright crimson color in the fall. See cut.

2 year.....\$0.50 3 year.....\$0.75

IVY, AMERICAN or VIRGINIA CREEPER. (*Ampelopsis Quinquefolia*.) A popular native vine with deeply cut leaves which turn to a beautiful crimson in the fall. Fine for covering rocky slopes, arbors, fences, etc.

2 year.....\$0.35 3 year.....\$0.50

MATRIMONY VINE. (*Lycium Chinense*.) Planted at the top of walls or embankments, this vine hangs gracefully down, covering beautifully the unsightliness of the ugly surface. The small, star-shaped, purple flowers are succeeded by bright, scarlet, coral-like berries nearly an inch long.

2 year.....\$0.35 3 year.....\$0.50

Roses

Rose Hill Roses Are Famous For Quality

OUR roses are extra fine large plants that bloomed freely last summer, most varieties being 2 to 3 feet high and with ordinary care will produce an abundance of flowers this coming summer. No better roses can be purchased. Our plants have not been packed in boxes and exposed on bargain counters for days, but are fresh from our nursery.

These fresh roses at 75c each are fully as good quality and size as roses sold in packs at stores for \$1.00 each.

POSTAGE—If shipment is wanted by parcel post please add for postage and packing figuring average weight of each rose at 2 pounds. See parcel post rates on page 33.

Ever-Blooming Hybrid Tea Roses

These are the so-called ever-blooming roses. If the bushes are kept healthy and in good growing condition, though they do not bloom all the time, one crop of flowers follows another at short intervals from June to late October. Winter protection is necessary. The flowers are very beautiful in color, form and fragrance.

Strong 2-year plants. \$0.75 each, \$7.50 per doz. Extra heavy. \$1.00 each, \$10.00 per doz.

BETTY UPRICHARD. Copper red buds open to good sized flowers of salmon-pink tinted with copper-pink on the outside. Spicy fragrance. Continuous bloomer.

DAME EDITH HELEN. A sweetly scented, clear pink Rose of fine form. This vigorous plant produces bloom freely on long, strong stems.

E. G. HILL. Glowing crimson-red with dark shadings. A fine, full flower carried erect on strong stems. Good foliage. Very free flowering.

ETOILE DE HOLLANDE. The half-opened flower is perfect in form and develops into a large, artistically loose bloom of brilliant crimson. It has wonderful fragrance. The plant is strong, with large, healthy foliage, and will thrive in almost all soils and situations.

FRAU KARL DRUSCHKI. A hybrid perpetual Rose. Considered the best white Rose of any class. The splendid, snow-white flowers have beautiful form. Blooms are borne freely on a strong growing plant. See picture.

GRUSS AN TEPLITZ. The double blooms of medium size are brilliant crimson with darker shadings. Splendid fragrance. Blooms most freely in open clusters through the whole season. A universal favorite.

HADLEY. A rich crimson-red flower with velvety texture, good form and lovely perfume. See cut.

KAISERIN AUGUSTE VICTORIA. Well formed, creamy buds develop into flowers of perfect form, snow-white with slight tint of yellow at the center. Fragrant. Extremely lovely.

KILLARNEY. Has long pointed buds opening to a flat flower with enormous petals. Bright pink in color. A very free-flowering, vigorous grower. See cut.

MRS. E. P. THOM. Rated as one of the best yellows. A very free, continuous bloomer; growth strong and bushy.

PINK RADIANCE. The most reliable pink Hybrid Tea Rose. Brilliant rose pink buds, opening to well-shaped, very fragrant flowers, which have splendid keeping quality when cut. See cut.

PRESIDENT HOOVER. Very highly colored, vivid cerise pink suffused with yellow, orange and scarlet. Delightfully perfumed. One of the newer Roses.

RED RADIANCE. The flowers are large, deep red; produce freely until frost. Foliage excellent. A very popular Rose.

ROSE MARIE. Fragrant, clear, rose-pink flowers of large size, borne freely on plants of notable vigor and health.

SUNBURST. Beautiful yellow flowers strongly suffused with orange at the center. Flowers are well shaped and fragrant. See cut.

TALISMAN. Rich yellow and rose-red. Vigorous, upright grower, bearing many blossoms; splendid for cut flowers.

CLIMBING AMERICAN BEAUTY. The delightful rosy crimson flowers are produced on separate stems in clusters. Their lovely fragrance and profusion of bloom give this rose high rank.

CRIMSON RAMBLER. The flowers are produced in great trusses, often thirty or forty in a cluster, appearing like large bouquets. The roses are small, semi-double, and of a bright crimson color.

DOROTHY PERKINS. The rather large, double, clear shell-pink flowers are borne in pendulous sprays. The fragrant flowers do not fade in color.

DR. W. VAN FLEET. The perfectly formed buds are borne on long, stout stems. In color they are flesh pink, deeper at the center. Splendid for cutting, very fragrant. Dark glossy foliage.

EXCELSA. The deep scarlet crimson blooms are produced in profusion in large clusters. A vigorous grower. Has largely replaced the Crimson Rambler.

PAUL'S SCARLET CLIMBER. The well-shaped scarlet flowers are of moderate size and borne in small trusses. They are borne early and last a long time. The plant is of moderate size with good foliage. See cut.

PRIMROSE. Hardy climber, abundance of double canary-yellow blooms.

STAECHELIN. (The Spanish Beauty.) A splendid new climbing Rose, which has the added advantage of being excellent for cutting, as the flowers are borne on 12 to 15 inch stems. Crimson buds opening into large, semi-double pink flowers. The plant is extremely vigorous, making a growth of 10 feet or more each year. One of the most useful and effective.

TAUSENSCHÖEN or THOUSAND BEAUTY. Prettily ruffled large flowers of shades of creamy white and changing to bright rose-pink. A healthy grower.

WHITE DOROTHY PERKINS. The flowers are rather small, very double of pure creamy white. Blooms in profusion on strong healthy plants.

Paul's Scarlet Climber
Intense scarlet

Baby Rambler or Polyantha Roses

These rather small, bushy plants are the most truly ever-blooming of all roses. The bloom is borne in heavy clusters throughout the summer until frost. The size of the bush makes it especially adaptable to home yard plantings. Require careful covering for winter.

2-year-old plants \$0.75 each

CATHERINE ZIEMET. Double, pure white flowers in abundance, borne in large fragrant clusters.

MISS EDITH CAVELL. The semi-double flowers are a brilliant scarlet red, rather small in size, produced in large clusters.

ELLEN POULSEN. Rather large, full flowers of bright rose-pink in large compact clusters. Fragrant; profuse blooming.

HOW TO PLANT ROSES

1st. Dig a hole so large the roots won't be cramped.

2nd. Place plant depth shown. Fill hole nearly to top with rich soil. Water thoroughly to firmly settle soil.

3rd. Trim plant to about 7 or 8 inches in height as picture shows.

4th. Cover entire top of the plant with a mound of loose soil about 9 inches high.

5th. In about two weeks pull a little of the loose soil away to observe if buds are bursting open. If buds are opening, carefully pull away the mound of loose soil. If buds are still dormant leave the mound of soil until buds are observed to burst open, then remove mound.

WINTER COVERING—Cover for winter this same way and over the mound place about a foot of marsh hay, then a layer of building paper.

Trees

FOR SHADE AND BEAUTY

At Small Expense You Can Plant a Tree That Will Grow Into Priceless Value

NOTE—Shade and ornamental trees are usually too large for parcel post and can be shipped freight or express to better advantage.

CRAB, Flame. (Minnesota No. 635.) This is primarily an ornamental crab but the fruits, though small, make an excellent red jelly. The flowers are similar to other crabs but are borne in great profusion. The tree is compact in growth and of medium size, suitable for lawn planting. The fruits are a brilliant red and hang tenaciously to the trees until mid-winter, months after the leaves have fallen. The effect is a mass of flaming red color from August until November. Trees 5 to 6 feet high often have 250 or more brilliant red colored crabs. The fruit is attractive to winter birds.

Bolleana Poplar

ELM, Lake City. The outstanding characteristic of the Lake City Elm is its upright manner of growth, which develops a conical shaped tree. The foliage is a dark glossy green and of large size. The branches are strong and the tree makes unusually fast growth. The extreme variations of the American Elm is avoided when the Lake City Elm is used.

1 1/2 in. diam.	\$2.50	2 1/2 in. diam.	\$5.00

HACKBERRY. (*Celtis Occidentalis*.) This tree is related to the elm and resembles it in foliage and twig characteristics. The bark is ridged in an interesting manner. The Hackberry is ideally suited to boulevard and yard planting for it not only is a beautiful tree but is comparatively free from insect pests and stands city conditions well. It will grow in exposed situations and on poorer soil than many other trees. The sweet berries provide bird food.

Beautiful *Gladiolus* – Grand for Cutting

FOR beautiful flowers, available from July until late fall, there are none more dependable or magnificent than the Gladioli. Planted in clumps they are attractive in the garden and as a cut flower they have no peer. By planting at intervals, about one week apart, starting the first part of May and continuing to the middle of June, a succession of bloom may be had from July until late fall. Plant the bulbs in cultivated, well-drained soil about 5 inches deep. They do best in full sun. When cutting 3 or 4 leaves should be left to the plant which will allow the bulb to properly mature. After the first killing frost, take the bulbs up carefully and cut off the stalk about 1 inch from the bulb and allow it to dry about one week. Then pack in shallow boxes and place for the winter in a cool dry cellar where the temperature will not go below freezing. The following varieties are among the most lovely and dependable:

POSTAGE—If wanted by parcel post please add for postage and packing figuring at the average weight of 2 pounds to a dozen Gladioli. Please see postage rates on page 33.

Peonies

Rival of the Rose

Care should be taken in planting the Peony, to set the roots with the eyes about 2 inches below the surface of the soil. Planting too deep will prevent blooming though the plant may otherwise seem healthy. Peonies do best in fairly heavy soil. If, therefore, your ground be very light and sandy it is advisable to incorporate considerable clay with it. Peonies are gross feeders. Thoroughly decomposed cow manure or commercial fertilizer should be used but care must be taken not to have the fertilizer come into direct contact with the roots.

We offer strong 3- to 5-eye roots at prices quoted. Also 6- to 8-eye, blooming size roots at double the price quoted after each variety.

CHERRY HILL. A charming soft velvety, garnet red. Blooms very early on a tall plant with erect stems. **75c** each.

COURONNE D'OR. Pure white with a circle of gold stamens. A very fragrant semi-rose type. Late mid-season bloom. The cut flowers keep very well. **50c** each.

FELIX CROUSSE. The bomb-shaped flower is a rich, brilliant ruby red. The flower is large and comes into bloom in late mid-season. **75c** each.

FESTIVA MAXIMA. Early white with inner petals slightly tipped carmine. Free-blooming and fragrant. **50c** each.

FRANCES WILLARD. Very large, white delicately shading pink. Pleasantly perfumed. Strong growing and lasting as a cut flower. Late mid-season. **75c** each.

GROVER CLEVELAND. Dark crimson. A late rose-type, strong, vigorous grower with large, full flowers. **\$1.00** each.

KARL ROSENFELD. Flower crimson, large, compact semi-rose type. Mid-season. Very strong, tall and free-blooming. Slightly fragrant. **\$1.00** each.

LE CYGNE. The finest white peony. Large, perfectly formed flowers, cream white with a touch of green at the heart. A strong growing plant. **\$2.00** each.

L'ESPERANCE or EDULIS SUPERBA. Bright pink with slight violet shadings at base of petals. Large crown type. Early. Fragrant. Strong and upright in habit. A very free bloomer. **50c** each.

LOUIS VAN HOUTTE. Fine violet-red bloom of dazzling effect. Very fine, shapely bloom. Medium to large flower. Mid-season. **75c** each.

MARTHA BULLOCK. A mammoth flower of deep rose pink, shading lighter, strongly fragrant. Stems stiff and strong. Late blooming. **\$1.00** each.

MONS. JULES ELIE. Color a beautiful pure pink. This is one of the finest peonies. Blooms early mid-season. **\$1.00** each.

PRESIDENT ROOSEVELT. A deep, rich, glowing red of very unusual shade. A strong-growing, truly grand peony. **75c** each.

REINE HORTENSE. Lovely delicate hydrangea pink. Deliciously fragrant. Large flower, on strong, erect stems. Blooms mid-season. **75c** each.

SOLANGE. Creamy white, suffused with an orange-salmon shading. Flower of fine form. Late blooming. **\$1.00** each.

SARAH BERNHART. It is one of the strongest growers. Flowers are exceptionally large, apple blossom pink with each petal silver tipped. This flower must be seen to be fully appreciated. Fragrant. **\$1.00** each.

STATICE LATIFOLIA. Sea Lavender or Lavender Baby's Breath. Myriads of lavender colored tiny flowers resembling the general form of the Baby's Breath. Leathery, dark green leaves close to ground. Showy in the garden and splendid as a cut flower. May be dried for winter use. 35c each. Dozen \$3.85.

THERMOPSIS. Caroliniana. A lovely plant whose general appearance is that of a yellow lupine. Grows about 2 feet high. Blooms in June and July with 6 to 12 inch racemes of yellow, pea-like flowers. Rich green foliage. 50c each. 6 for \$2.70.

Yucca, Adam's Needle
Milky white

Viola Cornuta—Tufted Pansies

The flowers resemble the common Pansy in form, though not quite so large. Of very free flowering habit, they bloom from April until October and constitute a most colorful addition to the garden. The following varieties are among the very best:

APRICOT.* Beautiful rich apricot shade, tinged orange toward the center. 25c each. Dozen \$2.70.

ARKWRIGHT RUBY. Wonderful large rounded flowers of ruby crimson with terra cotta and darker markings. Fragrant. 25c each. Dozen \$2.70.

JERSEY GEM.* Pure, rich bluish-purple, slightly perfumed flowers. A most attractive variety. 25c each. Dozen \$2.70.

LUTEA.* The flowers are a bright golden yellow, contrasting beautifully with the darker shades of other varieties. 25c each. Dozen \$2.70.

PERFECTION. Light blue flowers in abundance all summer, very lovely planted with the yellow sort. 25c each. Dozen \$2.70.

SCOTCH BORDER.* The flowers are a perfect riot of color, combining practically every shade. 25c each. Dozen \$2.70.

Delicious Fruits

THE thrifty housewife has long known the savings made when fruits are grown at home. There is something about home-grown fruit that is different. It tastes better than any other. For their ornamental qualities alone, fruit trees are worth while. The next best thing to eating berries right off the vine is to have them served to you directly after picking.

POSTAGE—We recommend shipping fruit trees by freight or express. The 3 to 4 foot size and the 4 to 5 foot size may be shipped by parcel post, however. Figure weight at 3 pounds each for the 3 to 4 foot and 4 pounds each for the 4 to 5 foot. Please refer to parcel post rate table on page 33 to figure amount of postage to include with order.

Small fruits such as grapes, strawberries, currants, etc., can be shipped parcel post if desired. Please note weights given under each item.

- ANOKA.** A very early and heavy bearer. A medium sized tree, with fruit in quality equal to the Duchess.

BEACON. Originated at the University Plant Breeding Farm at Excelsior, Minn. A fine new apple hardy and of high quality. Ripens mid-August about the same season as Duchess. Will keep three or four weeks after picking.

DUCHESS. An apple of large size and beautifully colored red. Bears when young and abundantly. Excellent quality. Ripens very early.

HARALSON. Fruit solid red of fine quality. An all-winter keeper. Tree bears when young. The best winter apple for home use or market.
- McINTOSH.** Bright red fruit, fine flavor. Excellent quality. Keeps until January.

NORTHWEST GREENING. Fruit is green, turning yellow as it matures. Firm and of large size. Good winter keeper. Fine cooking apple for late winter and spring.

PATTEN'S GREENING. Fruit large, green; flesh white, excellent for cooking and eating during October and November.

PERKINS WINTER. Fine, large, rich red, round apples, resembling the Baldwin. Rapid, robust grower. Fruit keeps until May.

RED WING. Fruit is superior in size, beauty, quality, and keeps all winter. Extremely hardy.

WEALTHY. Fruit of the best quality. Bears when very young. A good market variety. The favorite apple for this section.

Hardy Crab Apples

See Prices Under Apples Except for Flame

- DOLGO.** A handsome tree with light green foliage and attractive red fruit. Fruit jells easily, a red jelly of excellent flavor. Very vigorous. The most dependable crab.

FLAME. (Minnesota No. 635.) This is primarily an ornamental crab but the fruits, though small, make an excellent red jelly. The flowers are similar to other crabs but are borne in great profusion. The tree is compact in growth and of medium size, suitable for lawn planting. The fruits are a brilliant red and hang tenaciously to the trees until mid-winter, months after the leaves have fallen. The effect is a mass of flaming red color from August until November. Trees 5 to 6 feet high often have 250 or more brilliant red
- colored crabs. The fruit during December and January is attractive to winter birds. As an ornamental tree in the fall it rivals all other trees with its attractive bright red fruit. Among the ornamental trees in our nursery last fall this ornamental crab attracted by far the most attention.
